

The background of the entire image is a dark field with a red grid pattern. The grid lines are thin and spaced evenly, creating a perspective that draws the eye towards the center. The grid is composed of both horizontal and vertical lines, forming a series of squares that recede into the distance.

NFT METaverse ON ETHEREUM

ZONE

WHITEPAPER

NEXT-GEN ART-FOCUSED METAVERSE ON ETHEREUM WITH UNIQUE DIGITAL IDENTITIES,
3D VR WORLD, AND INTERACTIVE 3D NFT ART. GRIDZONE IS A PLACE WHERE USERS
CONNECT, INTERACT, PLAY, CREATE, AND PARTICIPATE IN A DECENTRALIZED ECONOMY
WITH PROFOUND SOCIETAL IMPACT.

GRIDZONE DAO

Next-Gen art-focused decentralized autonomous organization (DAO) with gamified social experience, unique digital identities, and interactive 3D NFT ART on Ethereum.

GridZone DAO is governed by a collection of people authorized to act as a single economic entity where everything has strict rules defined by programming code that is transparent, controlled by the organization members, and not influenced by a central government. At its core, GridZone is a place where every social interaction is smart contract interaction.

GRIDZONE DAO

GridZone is a paradigm shift in the very idea of economic organization as it offers complete transparency, total shareholder control, unprecedented flexibility, and autonomous governance. As a member-owned community without centralized leadership, all agreements are executed in the form of open-source code that is self-enforced by the majority consensus of the GridZone community.

This autonomous behavior is independent of its creator and cannot be censored by one single entity, but instead by a predefined majority of the organization's members. The exact majority rules are defined in the GridZone governance smart contract consensus protocol.

N Y M

On GridZone, each identity is represented by a **N Y M** "pronounced NIHM and a shortened form of "pseudonym". **N Y M**s are digital DNA, a self-representation of a reputable persona or establishment in the interactive and collaborative next-gen community. Every **N Y M** is a non-fungible token (NFT), a true transformation into a binary world with its own unique digital DNA, stored on the **Ethereum** blockchain.

N Y M NFTs offer the user complete ownership of their digital identities which cannot be duplicated nor reproduced. **N Y M**'s digital identity verification is confirmed through the user's **Ethereum** wallet by creating a cryptographic signature that authenticates and proves ownership of the **N Y M** digital asset.

NYM

Console

NymPay

"NymPay", a non-custodial payment service, enables direct transfer of digital assets between NYMs through their Ethereum wallets for transfer of funds.

To fully utilize all features throughout GridZone, every NYM's interaction with smart contracts (such as signup and login processes, NFT minting and auctioning, staking or transfers of funds), requires Ethereum hardware or software wallet connected to GridZone through Metamask, WalletConnect, or Coinbase WalletLink protocols.

NYM

Console

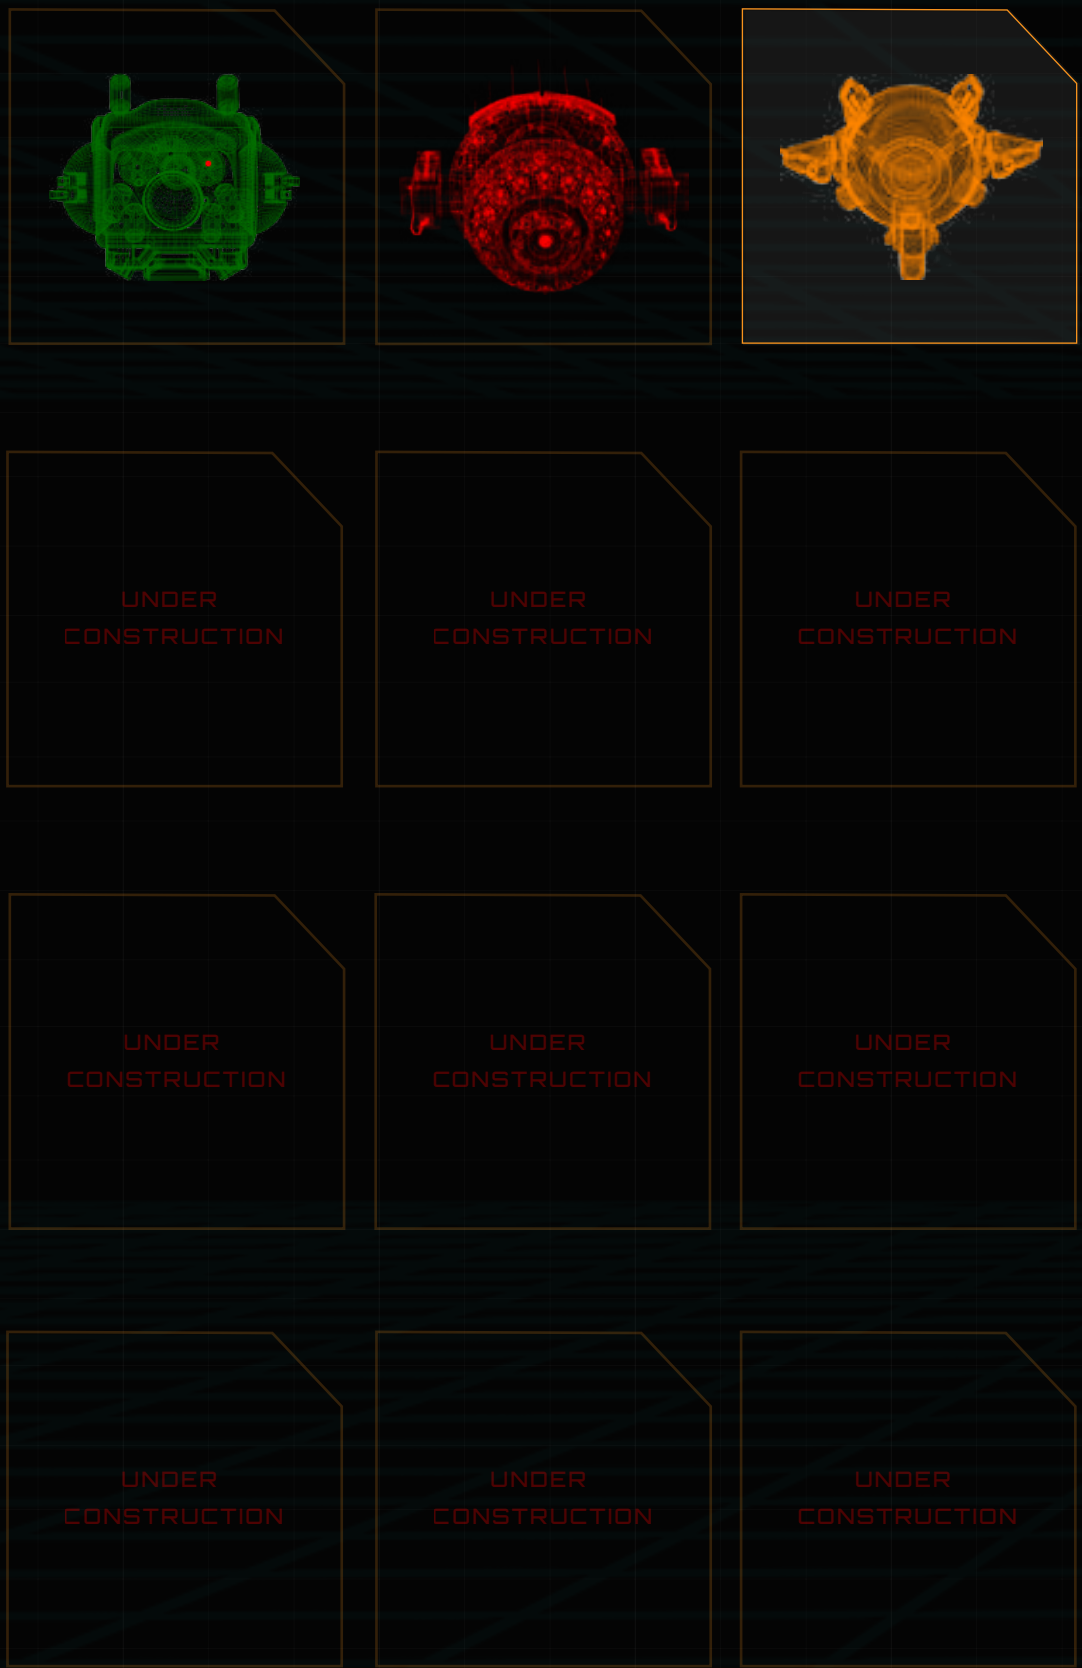

NymChat

"NymChat" is a simple, fast, and free messaging app for NYMs with an instant messaging feature built into GridZone that can be used on Android and iOS mobile devices.

NymChat can be used on any number of devices as all messages sync seamlessly across all NYMs phones, tablets, and computers. Through NymChat, NYMs can create private and group channels, share images and videos, and access their messages from several devices at once.

GRIDZONE BOT

BOT TYPES

Ethereum smart contract designed to perform various trading and utility tasks. **BOT** can be augmented with different improvement protocols which enhance its capabilities to benefit the user.

Depending on the type, **BOT** can perform different tasks ranging from staking digital assets in exchange for additional token rewards, NFT minting and airdrops, to recording the state of a NYM's wallet and claiming rewards in **ZONE** token or **NFTs** based on the balance of the wallet's address at the time of the snapshot.

BOT can be augmented to trade, watch and analyse markets, to provide the user with a wide array of useful information with minimal effort. **BOT** can interact with other **BOTs** and form **Botnets** consisting of many **BOTs** working together for increased rewards.

INTERACTIVE 3D NFT ART

As part of GridZone culture, NFT ART is an expression of NYM's creative skills and imagination presented through a series of authentic and distinguishable collectible digital assets that can be minted and auctioned on the GridZone NFT Marketplace.

GridZone is exclusive to a selection of Interactive 3D NFT collectibles. This special type of 3D NFT ART allows real-time interaction and exploration of aesthetic creations in their 3D visual form.

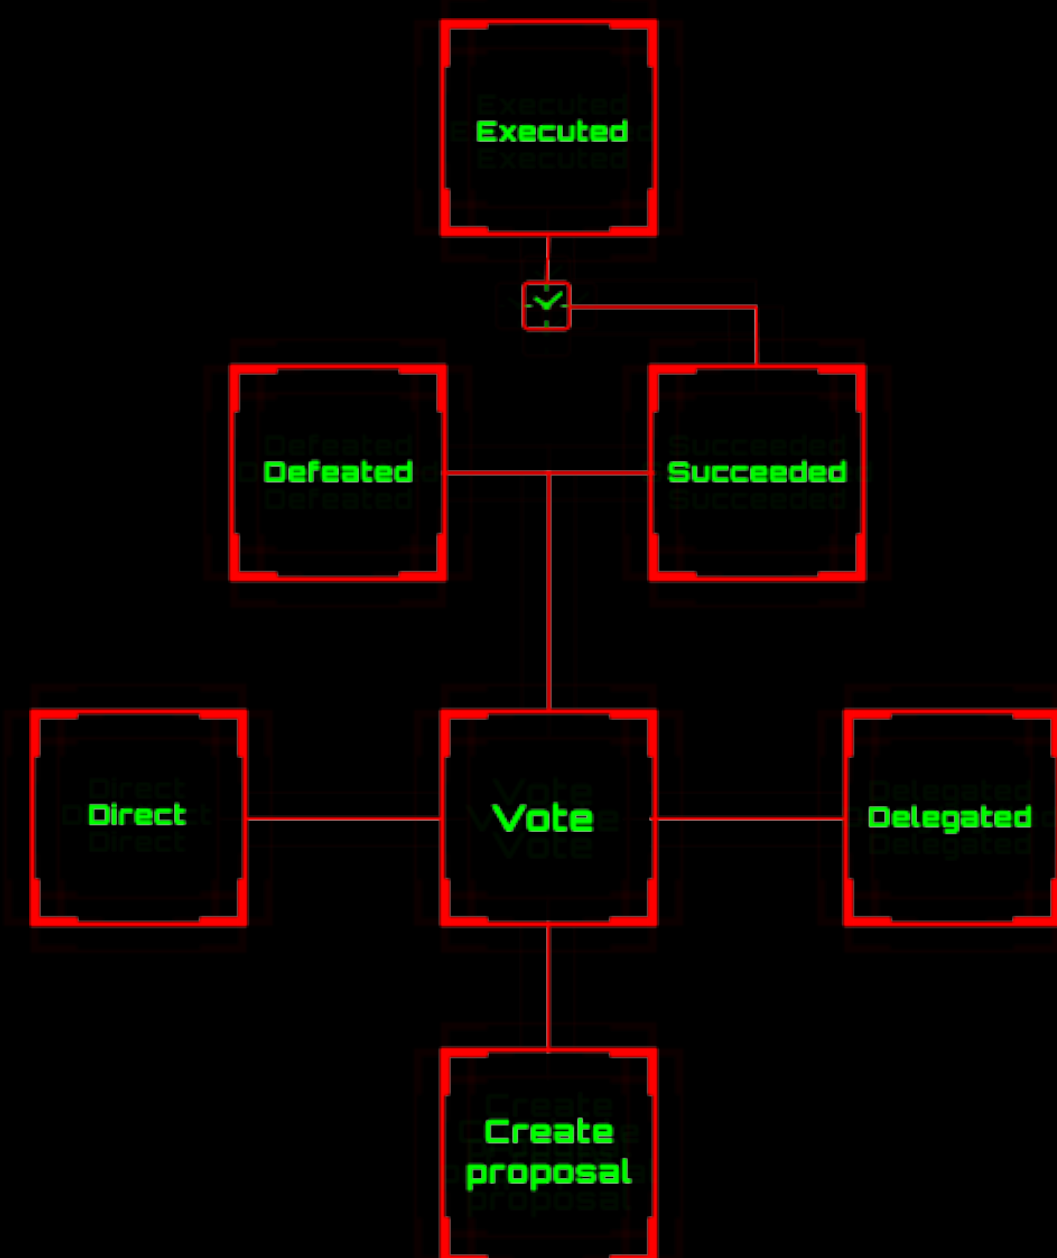

Once acquired, NFT ART provides NYM with various benefits throughout the GridZone.

GRIDZONE.IO (ZONE) TOKEN

GridZone.io (ZONE) Governance token, a utility token, empowers its owners with the ability to govern the GridZone platform. Not only does it enable them to propose and vote on the direction of the organisation but also allows them to have a voice on how GridZone spends its resources. This way ZONE token holders have total control over GridZone assets, distribution of profits, and future developments.

GRIDZONE GOVERNANCE

Any address with at least 0.1% (28,000) of ZONE tokens delegated to it may propose governance actions. When a proposal is created, the community of ZONE holders can submit their votes during a 3-day voting period.

In addition to direct voting which allows users to vote on proposals directly from their wallet, GridZone voting mechanism also utilises a delegated voting feature which allows users to delegate their votes to others, making the GridZone platform more of a representative democracy.

At least 4% (1,120,000) of votes in support of a proposal is required in order for a quorum to be reached and for a vote to succeed. If voting is successful, the proposal is queued in Timelock, and can be implemented after 2 days.

TOKEN DISTRIBUTION

28M TOTAL ZONE SUPPLY

- | | |
|------------------|------------------|
| GENESIS | PUBLIC SALE |
| TEAM | ADVISORS |
| TREASURY | COMMUNITY MINING |
| LIQUIDITY MINING | AIRDROP |

TOKENOMICS

10%
GENESIS
COMMUNITY
CROWDFUNDING

- 10% of total ZONE supply available for early community members and contributors.
- 4 months cliff starts on Genesis TGE

1.5%
PUBLIC SALE
PUBLIC
CROWDFUNDING

- 1.5% of total ZONE supply available for purchase
- sale starts 3 months after Genesis TGE

12%
TEAM

- 12% of total ZONE supply
- vested over a period of 24 months
- vesting starts on Genesis TGE

3.5%
ADVISORS

- 3.5% of total ZONE supply
- vested over a period of 12 months
- vesting starts on Genesis TGE

13%
TREASURY

- 13% of total ZONE supply
- locked for 12 months after Genesis TGE
- cannot vote

35%
COMMUNITY
MINING

- 35% of total ZONE supply progressively unlocked on halving schedule with 1 year periods: 50%, 25%, 12.5%, 6.25%, 3.125%, etc.
- each halving amount released in 4 quarterly non-linear emissions
- Q1 - 31.82% of the respective halving emissions
- Q2 - 26.76% of the respective halving emissions
- Q3 - 22.50% of the respective halving emissions
- Q4 - 18.92% of the respective halving emissions
- the 1st halving (50%) starts on Genesis TGE

23.5%
LIQUIDITY
MINING

- 23.5% of total ZONE supply
- follows the same halving principle and schedule as COMMUNITY MINING token allocation

1.5%
AIRDROP

- 1.5% of total ZONE supply
- 0.5% split between contributors/active users
- 1.0% split between other users
